

Van Zandt Animal Care Center

Keep your dog healthy for less with our monthly payment plans

Vaccinations help healthy dogs stay healthy

Vaccinating your dog is the simplest way to keep away contagious and fatal disease at bay. Our doctor and team will recommend a vaccination schedule that's appropriate for your dog.

Dogs age much quicker than we do.

So even if your dog looks healthy, illness and disease could be lurking undetected. Physical exams and diagnostic tests are crucial for finding problems not visible to the naked eye.

Prevention is the key to a longer life

Preventive care can help set the foundation for a lifetime of good health, so you and your dog can spend more quality years together. We see diseases late since our pets can't talk to us
