

# Van Zandt Animal Care Center

Keep your cat healthy for less with our monthly payment plans

## Illness is more common than you think

Cats are susceptible to diseases like feline leukemia, FIP, Distemper and a variety of upper respiratory viruses, even in door cats. So it's important to use a proven vaccine and deworming on a regular schedule

## Diseases can creep up quickly and quietly

Cats age much faster than we do. So even if your cat looks perfectly healthy, diseases and health problems could be lurking undetected. Physical exams and diagnostic tests are crucial for finding problems not visible to the naked eye.

## Prevention is the key to a longer life

Preventive care can help set the foundation for a lifetime of good health, so you and your puppy can spend more quality years together. We see diseases late since our pet's can't talk to us
